

TA 400

Ball valves
DN 10-15

TA 400

The TA 400 is a flexible and easy-to-install ball valve for heating, cooling and tap water systems. Pressure die casted AMETAL® cuts risk of leakage and ensures a long product lifetime.

Key features

> KOMBI connections

Flexible range of compression couplings ensures a smoother installation.

> AMETAL®

Dezincification resistant alloy that guarantees a longer valve lifetime and lowers the risk of leakage.

Technical description

Applications:

Heating and cooling systems
Tapwater systems

Function:

Shut-off

Dimensions:

DN 10-15

Pressure class:

PN 10

Temperature:

Max. working temperature: 95°C

Material:

Body: AMETAL®
Nipple: AMETAL®
Spindle: AMETAL®
Ball: AMETAL®
Sealing rings: EPDM-rubber
Handle: Acétal-plastic

AMETAL® is the dezincification resistant alloy of IMI Hydronic Engineering.

Surface treatment:

Chrome plated

Marking:

Body: TA 400 and inch size.

General:

The handle can easily be removed for valve maneuvering with a screwdriver.

Connection possibilities DN 10 (G3/8)

KOMBI G3/8

FPL G3/8

With KOMBI for smooth pipe / With FPL nut and cone for smooth pipe
